MGX 1.2 Configuration Acceptance Worksheet

Capstone exercise | Source requirement + configuration + evidence + unresolved item

Scenario: full-size fanless HPM; B/E bays; 27RU compute case; isolated return; Table 4/9 cooling boundaries.

Provided packet: nominal CAD fit, partial voltage-drop result, and connector locations. These leave open items.

Implementation / revision: _____ Reviewer / date: _____

Claim / source pages	Configuration / assumption	Required evidence	Owner / open item
Rack alignment / support pp. 17-25, 85-90			
HPM / bay interfaces pp. 28-33, 58-64, 65-80			
Electrical acceptance pp. 35-36, 47-49			
Liquid / connector / joint pp. 41-44, 81-84, 90			
Containment / materials pp. 46, 91-92			
Loads / qualification pp. 47-49, 88-90			

Decision: _____ Remaining condition / evidence owner: _____

Read requirement strength, units, test setup, and applicability. This exercise is not product qualification.
